P E R S O N A L P R O F I L E

I am an honest, resilient, and sociable person with a positive outlook who works comfortably and efficiently in a fast-paced environment while striving to complete my work to a high standard at all times. I'm a fast learner who is always keen to develop new skills, and I can adapt to different work environments with ease. I'm well organised and take pride in my work, always focusing my energy on the most important tasks to ensure I complete them fully and to a high standard within any deadlines.

To-Do List

<https://github.com/mckensis/to-do-list>

HTML, CSS, JavaScript, Webpack, Git, LocalStorage

- I designed and built this CRUD application in order to keep track of my daily tasks by category
- Lists & tasks can be created & deleted. Tasks can also be completed & have priority level updated
- Store task data such as 'complete' status, priority level, and due date using the Web Storage API
- Utilised Webpack to bundle all files into a miniature file size and organise code

Weather Forecast

<https://github.com/mckensis/weather-forecast>

HTML, CSS, JavaScript, Webpack, Git, OpenWeather API

- Programmed a web application to display the current weather & later forecasts at a given location
- Used async & await to fetch data from three different OpenWeather APIs
- Formatted the received JSON & displayed relevant data to the user such as temperature & time
- Used ES6 Modules to organise my code by splitting it into role specific files

Battleship

<https://github.com/mckensis/battleship>

HTML, CSS, JavaScript, Webpack, Git, Jest

- I coded a web app version of the classic Battleship boardgame with a built in AI
- Constructed the game logic using Object Oriented Design
- Experimented with JEST Libraries to create thorough tests & utilise Test-Driven Development (TDD) strategies
